

**IN THE SPECIFICATION**

Please amend the appropriate paragraph of the specification in accordance with proposed changes, as outlined hereinbelow:

Please amend page 13, lines 4 to 10, as follows:

Further, since the cast iron-plate (b1) is extremely hard, even if it is brought into contact with the first contact member (2), the cast-iron plate (b1) is not deformed or a contacting trace ~~[[should]]~~ does not ~~be remained~~ remain. However, if the stationary member ~~[[C )]]~~ (B) is made of wood, the contacting trace may remain in such ~~[[a]]~~ wood and therefore, it is important to select appropriate embodiments which will be described later.
